Our Pro's GPS fleet management systems are applicable in any type of asset tracking scenario, including truck, trailer, van and car tracking, personal tracking, bikes, as various types of equipment and inventory.

## Our Strength

Our innovative hardware features driver behaviour, accident buffer and advanced anti-tamper technology as standard, offering our customer the widest range of benefits in the marketplace. We offer highly configurable, modular and scalable solutions with many additional hardware options that address a variety of challenges and meet precise business and operational requirements.

This enables better-informed strategic decision making, using highly flexible reporting that is simple and easy to use, to achieve fleet efficiencies and reduce costs. Our automated scheduled email reports include journey, timesheet, mileage, exception, driver behavior, fuel and utilization to ensure the right data is delivered to the stakeholder in the most effective format at the right time.

## Our Vision

To be recognized as a Fleet Management and Tracking Solution company active world wide.

## Our Mission

Our mission is to provide cost savings, security and business operation optimisations for vehicle fleets by providing innovative and complete solutions in a wide range of different industries.

## Our Values

We have passion to achieve the highest attainable levels of:

- Integrity, in every aspect of our business and personal lives
- Mutual respect for all
- Flexibility, energetic responsiveness and dedication
- Accountability, superior results & recognition
